

Commerzbank Corporate Clients

Solutions Overview — internal reference

A short reference of Commerzbank offerings for corporate clients. Not every entry below fits every client — read carefully and match by what a client actually needs, not by name alone.

Mittelstandsbank Direkt

A dedicated relationship model for mid-sized corporate clients. One team, reachable by phone, video or digital channels for everyday questions — with direct access to a personal advisor from the team whenever a decision is complex enough to need one. Combines digital convenience with real personal consulting, rather than replacing one with the other.

Firmenkundenportal (Corporate Clients Digital Channels)

The bank's digital self-service channel: 24/7 online access to accounts, payments, financing overviews and administrative self-services through the Corporate Banking portal and app. Built for speed and independence — there is no dedicated personal advisor built into this channel itself.

FX Live Trader Web

A self-service online trading platform for foreign-exchange business. Over 100 currency pairs, accessible from desktop, laptop or tablet, with no software installation required. Clients place and manage FX trades themselves, on their own schedule, without going through an advisor for each transaction.

FMS Live

A proactive advisory team for currency, interest-rate and commodity risk management. Clients work with a personal specialist to develop a hedging strategy — the team executes and manages positions together with the client, rather than the client trading independently online.

Trade Finance Direkt

A specialist team for documentary international business. Supports clients along the full supply chain with letters of credit, documentary collections, avals, and import and export financing — built for exactly the kind of cross-border delivery risk that comes with new overseas suppliers.

LoanPilot

An internal digital workflow tool used by relationship teams to prepare and structure financing decisions. Gives a clear view of credit lines, collateral and covenants for a client relationship, and finds the right credit process for a given financing request before it goes to a decision.

For internal use — Corporate Clients Mission Briefing. Descriptions condensed for training purposes from internal product documentation.
