**** FAZIT ****

Globex Toys is in a growth phase across all three product lines. Currency exposure (Canada) and a pending capacity decision for Outdoor Play Equipment are the topics to track. Client wants routine banking digitised, but a personal contact retained for anything complex.

**** GESCHÄFTSENTWICKLUNG ****

Ms. Schneider opened with a general update – FY2025 revenue is tracking well ahead of plan across all three product lines, and the team has grown by four hires since the start of the year, including a new logistics coordinator. She also noted that raw material costs for timber have been broadly stable over the past year, which has helped margins in the Outdoor Play Equipment line. Globex Toys will again exhibit at the Spielwarenmesse in Nuremberg next January, with a larger stand than in previous years.

**** KANADA / WÄHRUNGSEXPOSURE ****

International sales through the Canadian retail partner have expanded significantly again this year, following strong growth over the past two years. Ms. Schneider confirmed Canada is now the company's most significant foreign market by currency exposure, ahead of the UK.

**** BETREUUNGSMODELL ****

Ms. Schneider reiterated that Globex Toys wants to move routine banking – payments, account statements, standard transfers – to digital self-service wherever possible, to free up her team's time. At the same time, she was clear that for complex matters – financing decisions, trade finance, currency hedging – she wants to keep a dedicated personal contact, and does not want these topics handled purely through digital channels.

**** LIEFERKETTE / KAPAZITÄT ****

On the supply side, Ms. Schneider flagged ongoing delays with electronic components (displays, sensors, circuit boards) sourced from suppliers in Vietnam and China for the Educational Computer Games line. The last two shipments arrived 6–8 weeks late. This does not affect the Outdoor Play Equipment line, which uses European timber sourced from established regional partners. Globex Toys is planning to expand production capacity for Outdoor Play Equipment at the Nuremberg site (new assembly line); no firm completion date was given, internal planning is still in progress and a decision on timing is expected later this year.

**** FORMALES/ORGANISATORISCHES ****

No plans regarding the Board Games line were discussed in this meeting.

**** NÄCHSTE SCHRITTE ****

Relationship Manager to follow up on financing options for the capacity expansion (see also Financial Snapshot); to share updated FX hedging materials ahead of next quarter.
